

**Final Reflection on Research Experience Assignment**  
**Due by May 15<sup>th</sup> (10pts)**

Instructions: Write a 1.5-2 page summary (double-spaced) reflecting on your growth as a researcher (and/or consumer of research) from your personal experiences designing and conducting a research study in this class. Please consider *all* the research experiences associated with this class, including, the mini labs, the development and execution of your team research project, the presentation of your research, the Piper Center Lab, etc. In your reflection, please describe, in detail:

- A) Any emerging vocational and/or academic interests based on your experiences doing research in this class
- B) The specific skills you practiced or gained in this class that may contribute to your overall personal or academic growth
- C) Any specific skills or course knowledge that you brought from *other* classes (within or outside ██████████) that you've taken at St. Olaf that may have helped prepare you to conduct your own research
- D) Your individual contributions to your team research, your strengths, and areas of improvement

You will be assessed for answering each of the points (A-D) outlined above.
