

Note: This prompt represents one question from an exam.

PROMPT

Question 20. Along the [REDACTED] course you learn to manage and interpret data about the natural environment in different ways. Observe the figure that portraits the same place in three different years (1975, 1985, 1995) in order to: 1) evaluate the data; 2) identify and describe patterns; and 3) elaborate a hypothesis. Write a short paragraph and be specific (worth 6 points).
