

**St. Olaf College OLE Core General Education Curriculum  
Social Sciences Requirement**

**Description:**

Students use social science approaches to better understand the complexity of human systems. The examination of these systems through theories or empirical evidence helps students understand their intersection with specific communities and/or the wider environment, while developing their ability to understand social science research or theories.

**Intended Learning Outcomes:**

*Students will:*

1. Analyze social systems and human behavior within those systems.
2. Identify social science research methods or theories.
