

Cancer CARE for LifeSM

an INTERLINK[®] Health Company

After a positive Cologuard test, Maria (name changed for privacy) had a colonoscopy that found a mass. Tests showed the cancer had spread to her lymph nodes, which was very hard news to hear.

Through the Cancer CARE for Life program, Maria was matched with her own oncology nurse, Lida. Lida helped review Maria's treatment plan and made sure it was the best option for her. That gave Maria comfort and peace of mind.

When Maria learned that one of her medicines would cost more than \$1,000 a month, Lida quickly stepped in. She found a program that lowered the cost to only \$50 a month. Without that help, Maria would have needed IV treatments that could have added about \$40,000 in extra costs for her health plan.

During treatment, Lida stayed by Maria's side—helping her handle side effects, plan healthy meals, and get ready for doctor visits. Maria said Lida's support helped her feel calmer and more in control.

Lida still checks in and cheers Maria on, showing how Cancer CARE for Life nurses truly make a lasting difference in people's lives.
