

HEDS Returning Student Survey Comparison Report St. Olaf College

How Well Students Think They Responded to Changes in the Spring Semester

In Q6 of the survey, we asked students how well they think they utilized five resilience strategies in adapting to changes at their institutions stemming from COVID-19 in the spring. (Q6 text: "Changes from COVID-19 have disrupted the lives of people across the country, including many students, staff, and faculty at colleges and universities. Looking back on your academic experience in the spring after your classes moved to an online format, please rate how well you did each of the following.") In the graphs below we show results for Q6. The first graph compares your students' responses to those of students from all other participating institutions. The following graphs focus on your students only: the second graph breaks down results by gender (women and men) and the third graph breaks down results by race/ethnicity (U.S. white, U.S. persons of color, and international).

**% of Students Who Rated Their Performance as "Good" in Each of the Following Areas -
Your Students, by Gender**

**% of Students Who Rated Their Performance as "Good" in Each of the Following Areas -
Your Students, by Race/Ethnicity**
