

# Ole Biology J-Term Study Abroad Seminar!

## Field Paleontology

Bio131 students will share highlights from their adventures across paleontological digs throughout Florida. Come learn how your classmates camped, rafted, and dug to collect fossil remains spanning millions of years. This course is offered periodically in January.

## Equatorial Biology

Come and learn about biodiversity in 4 tropical ecosystems. Bio288: Equatorial Biology students will share their 2024 experiences in the Amazon rainforest, cloud forest, paramo, and the Galapagos Islands. This biology J-term course is usually offered every other year.
