

 ST. OLAF PHYSICS DEPARTMENT

COLLOQUIUM SERIES

James Webb, Artemis, Dragonfly and more: The Advanced Engineering of Space Systems

Dennis Thompson

Retired senior staff scientist
at Kodak Space Systems

Janet Barth

Former chief of electrical
engineering at NASA

WEDNESDAY SEPTEMBER 25

3:00 - 4:30 PM | RNS 210

Dennis Thompson and Janet Barth will discuss their involvement with some of the most famous space systems ever flown. Janet will also describe the future directions of space missions, poised to draw on new generations of scientists and engineers.

Event Sponsered by IEEE
(Institute of Electrial & Electronics Engineers)
